### **The Power Off and Sleep Timers**

The product enters sleep mode or turns off automatically if it is not used for a period of time. You can adjust the time period before power management begins, but increasing the time reduces the product's energy efficiency.

Changing the Power Off and Sleep Timer Settings - Windows Changing the Power Off and Sleep Timer Settings - Mac

Parent topic: Product Basics

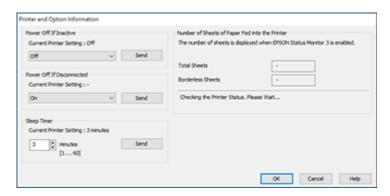

#### **Changing the Power Off and Sleep Timer Settings - Windows**

You can use the printer software to change the time period before the printer enters sleep mode or turns off automatically.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click. Select **Printer Settings** and click the **Maintenance** tab.

#### 2. Click the Printer and Option Information button.

You see this window:

3. Select the time period you want as the **Power Off Timer** setting.

**Note:** Your product may have the **Power Off Timer** feature or **Power Off If Inactive** and **Power Off If Disconnected** features depending on the location of purchase.

- 4. Click Send.
- 5. Select the time period you want as the **Sleep Timer** setting.
- 6. Click Send.
- 7. Click **OK** to close the open program windows.

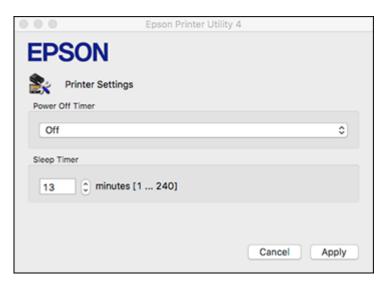

Parent topic: The Power Off and Sleep Timers

### **Changing the Power Off and Sleep Timer Settings - Mac**

You can use the printer software to change the time period before the printer enters sleep mode or turns off automatically.

- 1. In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.
- 2. Select Printer Settings.

#### You see this screen:

3. Select the time period you want as the **Power Off Timer** setting.

**Note:** Your product may have the **Power Off Timer** feature or **Power Off If Inactive** and **Power Off If Disconnected** features depending on the location of purchase.

- 4. Select the time period you want as the **Sleep Timer** setting.
- 5. Click Apply.
- 6. If you see the confirmation message, click **Yes**, and close the Printer Settings window.

Parent topic: The Power Off and Sleep Timers

### **Using the Epson Smart Panel Mobile App**

Use this free Apple and Android app to set up and control your Epson product. Epson Smart Panel also lets you check product status.

Note: App features may vary depending on your Epson product.

1. Visit latin.epson.com/connect to learn more about Epson Smart Panel and check the compatibility of your mobile device.

- 2. Download Epson Smart Panel from the Apple App Store or Google Play.
- 3. Do one of the following:
  - If your Epson product is already connected to a wireless network, connect your mobile device to the same network. Then open Epson Smart Panel and select your Epson product, if necessary.
  - If your Epson product is not connected to a wireless network, connect your mobile device to the network you want to use, then open Epson Smart Panel and follow the instructions to set up your Epson product.

Now you are ready to control your Epson product with your mobile device.

### **Epson Connect Solutions for Smartphones, Tablets, and More**

Use your smartphone, tablet, or computer to print and scan documents, photos, emails, and web pages from your home, office, or even across the globe.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Print from anywhere with these Epson Connect solutions:

- · Epson Email Print
- Epson Remote Print

Scan and send a file as an email or upload it to an online service directly from your Epson product with Epson Scan to Cloud.

#### **Using Epson Email Print**

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product. Both the email and the attachments will print automatically.

- 1. Connect your product to your network. See the link below.
- 2. If you did not already set up Email Print when you installed your product software, visit epsonconnect.com to learn more about Email Print, create your Epson Connect account, and register your product to the Epson Connect service.
- 3. Now you are ready to send and print emails to your product's Email Print address.

**Note:** Go to epsonconnect.com and log into your Epson connect account to personalize your product's email, adjust print settings, and set up other Epson Connect services.

Parent topic: Epson Connect Solutions for Smartphones, Tablets, and More

#### **Using Epson Remote Print**

With Epson Remote Print software, you can print from your laptop or desktop computer to an Epson Email-enabled product anywhere in the world.

- 1. Connect your Epson product to your wireless network. See the link below.
- 2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

Note: Make a note of your product's email address.

- 3. Visit epsonconnect.com to learn more about Remote Print and how to download the Remote Print Driver software.
- 4. Download and install the Remote Print software.
- 5. Enter the email address and optional access key of your Epson product during Remote Print setup.
- Now you are ready to print remotely. Select the print command in your laptop or desktop computer application and choose the Remote Print option for your Epson product.

### **Setting Up Printing on a Chromebook**

Your Epson printer supports native printing on Chromebook, allowing you to print from a Chromebook without drivers or cables.

For directions on setting up your printer, visit the Setting Up Your Epson Printer on Your Chromebook site.

Parent topic: Product Basics

### **Android Printing Using the Epson Print Enabler**

You can wirelessly print your documents, emails, photos, and web pages right from your Android phone or tablet (Android v4.4 or later). With a few taps, your Android device will discover your nearby Epson product and print.

- 1. Connect your Epson product to your wireless network. See the link below.
- 2. On your Android device, download the Epson Print Enabler plug-in from Google Play.
- 3. Go to **Settings** on your Android device, select **Printing**, and enable the Epson plug-in, if necessary.
- 4. Connect your Android device to the same wireless network as your product.
- 5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and print whatever is on the screen.

**Note:** If you do not see your product, tap **All Printers** and select your product.

Parent topic: Product Basics

## Wi-Fi Networking

See these sections to use your product on a Wi-Fi network.

**Network Security Recommendations** 

Wi-Fi Direct Mode Setup

Wi-Fi Protected Setup (WPS)

Printing a Network Status Sheet

Printing a Network Connection Report

**Changing or Updating Network Connections** 

### **Network Security Recommendations**

To help deter unauthorized access to your product over a network, you should protect your network environment using appropriate security measures.

Security measures such as these can help deter threats such as loss of user data, use of telephone and fax lines, and other intrusions:

#### · Enable security on your wireless LAN

Enable the appropriate security on the wireless LAN you plan to use with your product. Network security such as a network password can deter interception of traffic over the wireless LAN. Your router may already have a default password enabled by your Internet service provider (ISP). See your ISP and router documentation for instructions on how to change the default password and better secure your network.

#### Connect your product only to a network protected by a firewall

Connecting your product directly to the Internet may leave it vulnerable to security threats. Instead, connect it to a router or other network connection protected by a firewall. Your router may already have a firewall set up by your Internet service provider; check with your ISP for confirmation. For best results, set up and use a private IP address for your network connection.

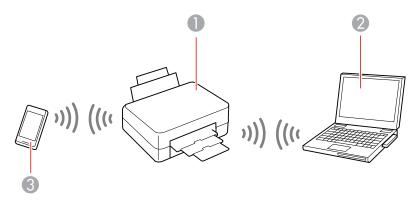

#### Change the default administrator password on your product

If your product has an option to set an administrator password, change the default administrator password to deter access by unauthorized users to personal data stored on your product, such as IDs, passwords, and contact lists.

Parent topic: Wi-Fi Networking

### Wi-Fi Direct Mode Setup

You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point. In Wi-Fi Direct Mode, the product itself acts as a network access point for up to 8 devices.

- 1 Epson product
- 2 Computer with a wireless interface
- 3 Other wireless device

**Enabling Wi-Fi Direct Mode** 

Parent topic: Wi-Fi Networking

### **Enabling Wi-Fi Direct Mode**

You can enable Wi-Fi Direct mode to allow direct communication between your product and computer or other devices without a wireless router or access point. Make sure paper is loaded before you begin.

**Note:** If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

1. Hold down the **Wi-Fi** button and press the it network status button until the Wi-Fi light and Wi-Fi Direct light flash alternately. Then release both buttons.

**Note:** When you are using an Android device and connect to the printer using Wi-Fi Direct, the Wi-Fi light and Wi-Fi Direct light flash simultaneously on the printer.

After both lights stop flashing, the Wi-Fi Direct light remains on.

- 2. Hold down the the network status button for about seven seconds to print a network status sheet.
- 3. Use your computer or wireless device to select the Wi-Fi network name (SSID) and password listed in the Wi-Fi Direct section of the network status sheet.

You should now be able to print to your product directly from your computer or device. If you cannot print successfully, repeat the process above and make sure you enter the password exactly as written on the network status sheet.

Parent topic: Wi-Fi Direct Mode Setup

### Wi-Fi Protected Setup (WPS)

If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).

**Note:** To check if your router is WPS-enabled, look for a button labeled **WPS** on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

Using WPS to Connect to a Network

Parent topic: Wi-Fi Networking

#### **Using WPS to Connect to a Network**

If you have a WPS-enabled router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your device to the network.

**Note:** To check if your router is WPS-enabled, look for a button labeled **WPS** on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

1. Press the **WPS** button on your router or access point.

2. Hold down the **Wi-Fi** button on your product for about five seconds until the Wi-Fi light and Wi-Fi Direct light flash alternately.

The Right turns green to indicate a successful connection.

**Note:** Be sure to press and hold the **Wi-Fi** button on your product within 2 minutes of pressing the **WPS** button on your router or access point.

Parent topic: Wi-Fi Protected Setup (WPS)

### **Printing a Network Status Sheet**

You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network.

To print the status sheet, hold down the it network status button on the product for at least seven seconds.

**Note:** If you release the button before seven seconds elapses, a network connection report is printed instead of a network status sheet.

Examine the settings shown on the network status sheet to diagnose any problems you may have.

Parent topic: Wi-Fi Networking

### **Printing a Network Connection Report**

You can print a network connection report that provides details of the connection between the product and the wireless router.

**Note:** The network connection report may be printed in a different language depending on your region, and cannot be changed.

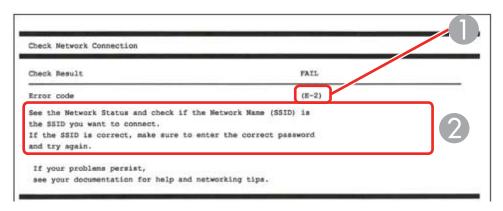

- 1. To print the network connection report, press the ট network status button on the product.
- 2. Review the information contained in the report and resolve any errors.

Network Connection Report Codes and Messages

Parent topic: Wi-Fi Networking

### **Network Connection Report Codes and Messages**

Check the error codes and messages on the network connection report to solve problems you may encounter with network connections. The tables here list solutions to problems based on the error codes and messages that may appear on the top of the report.

- 1 Error code
- 2 Message

**Note:** Error codes and messages listed here may not all apply to your product.

#### **Error Codes and Messages**

Error code and message	Solution
E-1 Confirm that the network cable is connected and network devices such as hub, router, or access point are turned on.	Make sure your router, access point, and/or hub are turned on, and the network cable is securely connected to your device and to your product.  If you are trying to set up Wi-Fi, remove the network cable and set up Wi-Fi again. Ethernet and Wi-Fi cannot be connected at the same time.

Error code and message	Solution		
E-2, E-3, or E-7	Check the following:		
Confirm that the router/access point is turned on and the wireless network (SSID)	Make sure your router or access point is turned on, and is correctly connected to your computer or network device.		
is set up correctly. Contact your network administrator for assistance.	Turn off the router or access point, wait about 10 seconds, and turn it on again.		
	Move your product closer to your router or access point, and remove any obstacles between them. Also move your product away from devices such as wireless phones or microwaves.		
	Confirm that the SSID shown on the network connection report matches the label on your router or access point. Also make sure your SSID uses only ASCII characters and symbols, or your product cannot display the SSID correctly.		
	If you are trying to connect using the WPS push button method, make sure your router or access point supports it.		
	If you are using a network password, check the label on your router or access point to confirm that you are using the correct password, or check with your network administrator or router/access point documentation.		
	<ul> <li>If you are connecting to a smart device that generates an SSID, check the device documentation for the SSID and password you should use.</li> </ul>		
	If your wireless connection suddenly disconnects, and another smart device was added to the network using a WPS push button method or your network was set up using a non-WPS push button method, try downloading and installing your product software again.		

Error code and message	Solution
E-5 Security mode (e.g. WEP, WPA) does not match the current setting of the printer. Confirm security mode. Contact your	If the security on your router or access point is not one of the following types, change the type of security on your router or access point and reset your product's network settings.
network administrator for assistance.	• WEP-64 bit (40 bit)
	• WEP-128 bit (104 bit)
	WPA PSK (TKIP/AES); also known as WPA Personal
	WPA2 PSK (TKIP/AES); also known as WPA2 Personal
	WPA (TKIP/AES)
	WPA2 (TKIP/AES)
	WPA3-SAE (AES)
E-6  MAC address of your printer may be filtered. Check whether your router/access point has restrictions such as MAC address filtering. See the documentation of the	If your router or access point has MAC address filtering enabled, register your product's MAC address so it is not filtered. Locate the MAC address on the network connection report and check your router or access point documentation for instructions.
router/access point or contact your network administrator for assistance.	If your router or access point is using shared authentication with WEP security, confirm that you are using the correct authentication key and index.
	If your router or access point limits the number of connected devices, raise the connection limit. See your router or access point documentation for instructions.
E-8 Incorrect IP address is assigned to the printer. Confirm IP address setup of the network device (hub, router, or access point). Contact your network administrator for assistance.	If your product's <b>Obtain IP Address</b> setting is set to <b>Auto</b> , enable DHCP on your router or access point. If it is set to <b>Manual</b> , the IP address may be out of range or on a different network segment; set a valid IP address using your product control panel or the Web Config utility. You can also try turning off your product and the router or access point, waiting about 10 seconds, and turning them on again.

Error code and message	Solution
Confirm the connection and network setup of the PC or other device. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	Make sure your computer or network device are turned on. Also make sure that you can access the Internet and other devices on the same network from the devices you are trying to connect to your product.
	If you still cannot connect to your product, turn off your router or access point, wait about 10 seconds, and turn it on again. Download and install your product software again to reset your network settings.
E-10 Confirm IP address, subnet mask, and	Make sure other devices on the network are turned on and do the following:
default gateway setup. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	If your product's <b>Obtain IP Address</b> setting is set to <b>Manual</b> , check the IP address, subnet mask, and default gateway addresses on the network connection report to see if they are correct. If not, correct the settings.
	If DHCP is enabled, set your product's <b>Obtain IP</b> Address setting to <b>Auto</b> . If you want to use the DHCP-assigned address as a static address, set the <b>Obtain IP</b> Address setting to <b>Manual</b> , enter the product's IP address as listed on the network connection report, and set the subnet mask to 255.255.255.0.
	If you still cannot connect to your product, turn off your router or access point, wait about 10 seconds, and turn it on again.
E-11 Setup is incomplete. Confirm default gateway setup. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	If you set your product's <b>TCP/IP Setup</b> setting to <b>Manual</b> , check that the default gateway address listed on the network connection report is correct. Also turn on the device that is set as the default gateway.

Error code and message	Solution
E-12	<ul> <li>Make sure other devices on the network are turned on and do the following:</li> <li>Make sure the IP address, subnet mask, and default gateway addresses are correct, if you are entering them</li> </ul>

	<ul> <li>Download and install your product software again to reset your network settings.</li> </ul>
	If your router or access point uses WEP security with several registered passwords, make sure that the first registered password is set on your product.

#### **Network Environment Messages**

Message	Solution	
The Wi-Fi environment needs to be improved. Turn the wireless router off and then turn it on. If the connection does not improve, see the documentation for the wireless router.	Move your product closer to your router or access point, and remove any obstacles between them. Then turn off your router or access point, wait about 10 seconds, and turn it back on again. If you still cannot connect to your product, check the documentation that came with your router or access point for solutions.	
*No more devices can be connected. Disconnect one of the connected devices if you want to add another one.	You can connect up to 8 computers or other devices to your product using a Wi-Fi Direct (Simple AP) connection. If you want to add another device, disconnect an existing connected device first.	

Parent topic: Printing a Network Connection Report

### **Changing or Updating Network Connections**

See these sections to change or update how your product connects to a network.

Accessing the Web Config Utility

Changing a USB Connection to a Wi-Fi Connection

Connecting to a New Wi-Fi Router

Disabling Wi-Fi Features

Parent topic: Wi-Fi Networking

### **Accessing the Web Config Utility**

You can select your product's network settings and confirm its operating status using a web browser. You do this by accessing your product's built-in Web Config utility from a computer or other device that is connected to the same network as your product.

**Note:** You can also access the Web Config utility from the product information area in the Epson Smart Panel app.

- Print a network status sheet.
- 2. Locate the IP address for your product that is listed on the network status sheet.

- 3. On a computer or other device connected to the same network as your product, open a web browser.
- 4. Enter your product's IP address into the address bar.

You see the available Web Config utility options.

Parent topic: Changing or Updating Network Connections

#### Changing a USB Connection to a Wi-Fi Connection

If you have already connected your product to your computer using a USB connection, you can change to a Wi-Fi connection.

- 1. Disconnect the USB cable from your product.
- 2. Uninstall your product software.
- 3. Download and install your product software from the Epson website using the instructions on the *Start Here* sheet.

Parent topic: Changing or Updating Network Connections

#### Connecting to a New Wi-Fi Router

If you change the wireless router you have been using on your network, you need to update your product's Wi-Fi connection to the new router.

**Note:** If you switch to a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation for instructions.

- 1. Do one of the following:
  - Windows: Uninstall your product software.
  - Mac: Go to the next step.
- 2. Download and install your product software from the Epson website using the instructions on the *Start Here* sheet.

Parent topic: Changing or Updating Network Connections

#### **Disabling Wi-Fi Features**

You may need to disable your product's Wi-Fi features if you change your network connection type or need to solve a problem with your network connection. You can disable the Wi-Fi features by resetting the network settings to their default values.

**Note:** Before disabling Wi-Fi features, make a note of your product's SSID (network name) and password, and any network settings selected for the Epson Connect services you may use. These settings will be reset to their default values.

- 1. Turn off the product.
- 2. Hold down the it network status button and press the  $\circ$  power button until the  $\circ$  Wi-Fi light and  $\circ$  Wi-Fi Direct light flash alternately. Then release both buttons.

When the Wi-Fi light and Wi-Fi Direct light turn off, Wi-Fi is disabled.

**Double-sided Printing Capacity** 

Compatible Epson Papers

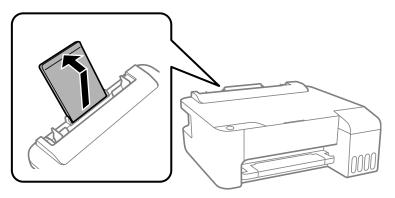

**Borderless Paper Type Compatibility** 

Paper or Media Type Settings

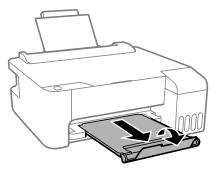

## **Loading Paper in the Rear Paper Feeder**

You can print documents and photos on a variety of paper types and sizes.

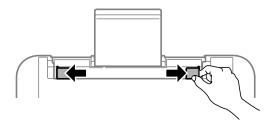

1. Pull out the paper support.

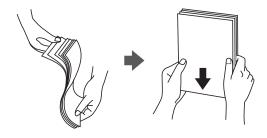

2. Pull out the output tray and open the paper stopper.

3. Slide the edge guides out all the way.

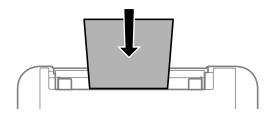

4. If you are inserting a stack of paper, fan the sheets first and tap the stack on a flat surface to even the edges.

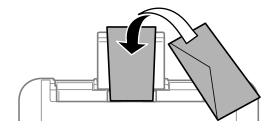

**Note:** Do not fan or curl photo paper.

#### 5. Do one of the following:

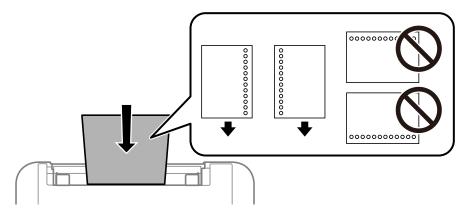

• Insert paper, glossy or printable side up and short edge first, in the center of the paper support.

• Load up to 10 envelopes in the center of the paper support. Load them printable side up and flap edge left.

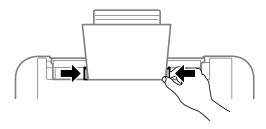

• Load a sheet of loose-leaf or other paper with holes facing as shown.

 To load a sheet of paper longer than legal size, close the paper support and flatten the leading edge of the paper as shown.

6. Slide the edge guides against the paper, but not too tightly.

Always follow these paper loading guidelines:

- Load only the recommended number of sheets.
- Load paper short edge first. However, when you have set the long edge as the width of the user-defined size, load paper long edge first.
- Do not load paper above the line just under the arrow mark inside the edge guide.
- If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.
- Do not load envelopes that are curled, folded, or too thin, or that have plastic windows or exposed adhesive flaps.
- Check the paper package for any additional loading instructions.
- If you use paper with binder holes, load only one sheet at a time in only these sizes: Letter (8.5 × 11 inches [216 × 279 mm]), A4 (8.3 × 11.7 inches [210 × 297 mm]), or Legal (8.5 × 14 inches [216 × 356 mm]).
- Do not load paper that is wavy, torn or cut, folded, damp, too thick or too thin, or has stickers.

• Return the remaining paper to its package. If you leave it in the printer, the paper may curl or the print quality may decline.

# **Printing from a Computer**

Before printing from your computer, make sure you have set up your product and installed its software as described on the *Start Here* sheet.

**Note:** If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select **Enable automatic checking** and click **OK**. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Printing with Windows
Printing with the Built-in Epson Driver - Windows 10 S
Printing on a Mac
Cancelling Printing Using a Product Button
Printing with Epson Photo+

# **Printing with Windows**

You can print with your product using any Windows application, as described in these sections.

**Note:** If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

- 1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.
- 2. Select Software Update Settings.

You see this window:

- 3. Do one of the following:
  - To change how often the software checks for updates, select a setting in the **Check every** menu.
  - To disable the automatic update feature, select the **Never** option.
- 4. Click **OK** to exit.

Note: If you choose to disable the automatic update feature, you can check for updates manually.

# **Selecting Print Settings - Windows 10 S**

Select the settings for your print job in your Windows 10 S application.

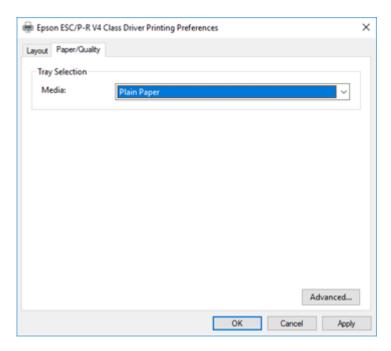

- 1. Open a photo or document for printing.
- 2. Select the print command in your application.

**Note:** You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

**Note:** You may also need to select **Properties** or **Preferences** to view your print settings.

# You see a window like this:

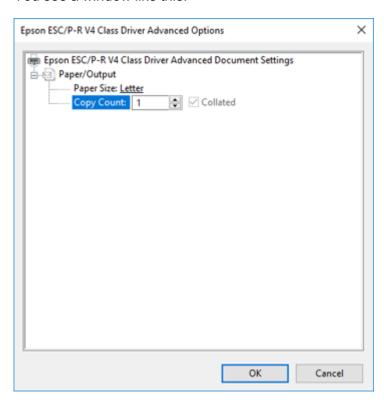

4. Select the type of paper you loaded as the **Media** setting.

**Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

5. Click the **Advanced** button.

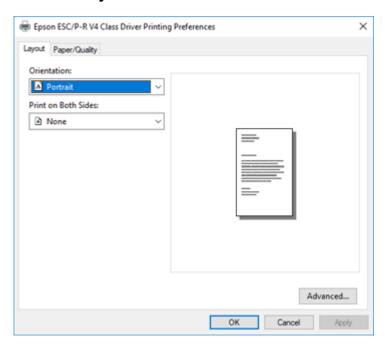

#### You see a window like this:

- 6. Select the size of the paper you loaded as the **Paper Size** setting.
- 7. To print multiple copies, select or enter the number as the **Copy Count** setting.
- 8. To print multiple copies of multi-page documents in sets, select the **Collated** checkbox.
- 9. Click **OK**.

You return to the printing preferences window.

# 10. Select the **Layout** tab.

- 11. Select the orientation of your document as the **Orientation** setting.
- 12. Click **OK** to save your settings.

You see your application's **Print** window.

13. Click **OK** or **Print** to start printing.

Selecting Printing Preferences - Mac Printing Your Document or Photo - Mac

Parent topic: Printing from a Computer

# **Selecting Basic Print Settings - Mac**

Select the basic settings for the document or photo you want to print.

- 1. Open a photo or document for printing.
- 2. Select the print command in your application.

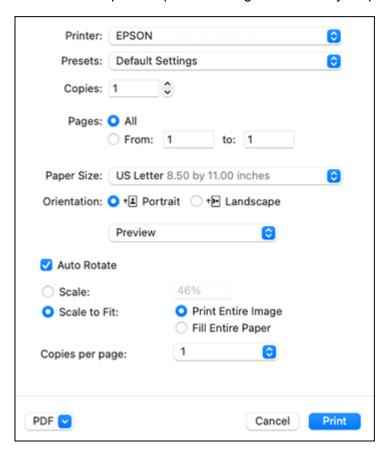

**Note:** You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. Select your product as the **Printer** setting.

4. If necessary, click the **Show Details** button to expand the print window.

You see the expanded printer settings window for your product:

**Note:** The print window may look different, depending on the Mac OS version and the application you are using.

5. Select the **Copies** and **Pages** settings as necessary.

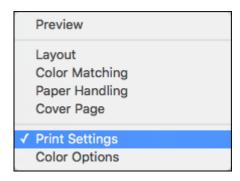

**Note:** If you do not see these settings in the print window, check for them in your application before printing.

6. Select the page setup options: **Paper Size** and **Orientation**.

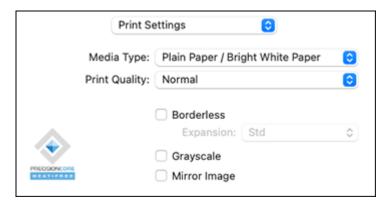

**Note:** If you do not see these settings in the print window, check for them in your application before printing. They may be accessible by selecting **Page Setup** from the File menu.

Note: Paper sizes may include additional options such as Borderless.

- 7. Select any application-specific settings that appear on the screen, such as those shown in the image above for the Preview application.
- 8. Select **Print Settings** or **Printer Features** from the pop-up menu.

# You see these settings:

**Note:** The available print settings and appearance of the print window may be different than those covered here, depending on the Mac OS version and the application you are using.

9. Select the type of paper you loaded as the **Media Type** setting.

**Note:** The setting may not exactly match the name of your paper. Check the paper type settings list for details.

- 10. Select the **Print Quality** setting you want to use.
- 11. Select the **Borderless** checkbox if you want to print a borderless photo. If the option is grayed out, change the **Media Type** setting to a paper type that supports borderless printing.
- 12. Select any of the available print options.

### **Managing Color - Mac**

You can adjust the Color Matching and Color Options settings to fine-tune the colors in your printout or turn off color management in your printer software.

1. Select **Color Matching** from the pop-up menu in the print window.

- 2. Select one of the available options.
- 3. Select **Color Options** from the pop-up menu in the print window.

**Note:** The available settings on the Color Options menu depend on the option you selected on the Color Matching menu.

4. Select one of the available options.

Color Matching and Color Options - Mac

Parent topic: Printing on a Mac

### **Color Matching and Color Options - Mac**

You can select these settings on the Color Matching and Color Options menus.

#### **Color Matching Settings**

#### **EPSON Color Controls**

Lets you manage color using controls in your printer driver or turn off color management.

### ColorSync

Prints using standard color profiles for your product and paper to help match image colors. You can customize the conversion method and filter settings on the ColorSync pop-up menu in the print window.

#### **Color Options Settings**

### **Manual Settings**

Lets you select manual color adjustments. Click the arrow next to **Advanced Settings** and select settings for **Brightness**, **Contrast**, **Saturation**, and individual color tones. You can also select a color **Mode** setting for printing photos and graphics and the **Fix Red-Eye** setting to reduce or remove redeye in photos. Depending on the selected color mode, you can also adjust the midtone density using the **Gamma** setting.

#### **Fix Photo**

Improves the color, contrast, and sharpness of flawed photos. Click the arrow next to **Advanced Settings** and select the **Fix Red-Eye** setting to reduce or remove red-eye in photos.

**Note:** Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off **Fix Photo** to retain the special color effects.

### Off (No Color Adjustment)

Turns off color management in your printer software so you can manage color using only your application software.

Note: An ICC profile is required if color management is turned off.

### **Selecting Printing Preferences - Mac**

You can select printing preferences that apply to all the print jobs you send to your product.

- 1. In the Apple menu or the Dock, select **System Preferences**.
- 2. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**.
- 3. Select **Driver** or **Options**.

You see a screen like this:

- 4. Select any of the available printing preferences.
- 5. Click **OK**.

**Printing Preferences - Mac** 

Parent topic: Printing on a Mac

### **Printing Preferences - Mac**

You can select these settings on the **Options** or **Driver** tab.

#### **Thick Paper and Envelopes**

Prevents ink from smearing when you print on envelopes or other thick paper.

### Skip Blank Page

Ensures that your product does not print pages that contain no text or images.

#### **Quiet Mode**

Lessens noise during printing but may decrease print speed.

### **Bidirectional printing**

Prints in both directions (right-to-left and left-to-right), speeding up printing, but may reduce print quality.

#### Remove white borders

Removes white margins that may appear when you print borderless photos.

### **Warning Notifications**

Lets you choose whether or not to receive warning notifications from the printer software for various operating conditions.

#### **Establish bidirectional communication**

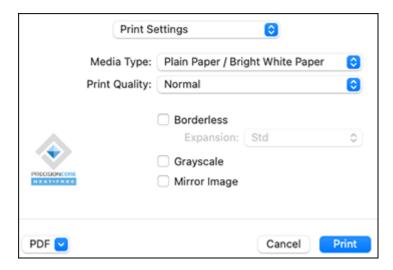

Allows the product to communicate with the computer. Do not change the default setting unless you experience issues when using a shared printing pool.

# **Refilling Ink**

When the ink level is below the lower line on an ink tank, you need to refill it.

Periodically check the ink tanks to see if they need to be refilled.

Before checking the ink levels or refilling an ink tank as described here, be sure to read the ink safety precautions.

**Caution:** If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on a tank could damage the product.

Ink Safety Precautions
Checking Ink Levels on Your Product

Refilling the Ink Tanks

## **Ink Safety Precautions**

**Note:** Epson strongly recommends the use of genuine ink to ensure optimal print quality and performance.

### **Ink Handling Precautions**

- Keep ink bottles and the ink tanks out of the reach of children. Do not allow children to drink from or handle the ink bottles and bottle caps.
- Do not tilt or shake an ink bottle after opening it; otherwise, ink may leak.
- Be careful not to touch any ink when you handle the ink tanks, ink tank caps, and opened ink bottles or ink bottle caps.
- If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them
  immediately with water. If discomfort or problems persist, see a doctor immediately. If ink gets into
  your mouth, spit it out and see a doctor right away.
- Do not shake or squeeze the ink bottles.
- If ink spills, wipe it up immediately. To prevent the ink from spreading, blot the spill with a dry cloth, then wipe it with a damp cloth. The ink will be hard to remove once it has dried.

#### Ink Refilling Precautions

- Use ink bottles with the correct part number for this product.
- · Do not mix with other Epson ink types.
- The use of non-Epson ink may cause damage that is not covered by Epson's warranty, and under certain circumstances, may cause erratic product behavior.
- This product requires careful handling of ink. Ink may splatter when the ink tanks are filled or refilled with ink. If ink gets on your clothes or belongings, it may not come off.
- Do not open the ink bottle package until you are ready to fill an ink tank. Ink bottles are vacuum
  packed to maintain reliability. If you leave an ink bottle unpacked for a long time before using it, print
  quality may be affected.
- If the ink level is below the lower line on an ink tank, refill the ink. Continued use of the product when the ink level is below the lower line on an ink tank could damage the product.
- Visually check the ink levels in the product's ink tanks to confirm the actual ink levels. Continued use of the product when the ink is below the lower line on an ink tank could damage the product.
- Do not maintain low ink levels for extended periods of time.
- Epson recommends filling all ink tanks to the upper line when the product is not operating.
- After bringing an ink bottle inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.
- Use the ink bottle before the date printed on the package.
- After opening an ink bottle, Epson recommends using it as soon as possible.
- Wipe off any ink around the tanks and ports with a clean, lint-free cloth or cotton swab.
- Store ink bottles in a cool, dark place. Keep them out of direct sunlight.
- Do not store the ink bottles in high or freezing temperatures.
- Store the ink bottles in the same environment as the product. When storing or transporting an opened ink bottle, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when you transport the bottle.
- Make sure the print head is capped properly to prevent the ink from drying.

#### Ink Bottle and Ink Tank Information

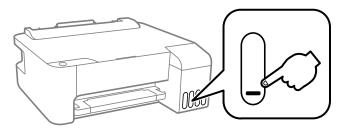

• To maintain optimum print head performance, some ink is consumed from all ink tanks during printing and when performing maintenance operations, such as cleaning the print head. Ink may also be consumed when the product is turned on.

- Some ink in the ink bottles supplied with your product is used during initial setup; these ink bottles will print fewer pages compared to subsequent ink bottles.
- Quoted ink yields may vary depending on the images you are printing, the paper type you are using, how often you print, and environmental conditions such as temperature.
- The ink bottles may contain recycled materials, but this does not affect product function or performance.
- The specification and appearance of the ink bottles are subject to change without prior notice for improvement.
- If an ink bottle is dented, you can still use the ink. The quality and quantity of ink will not be affected.
- When printing in monochrome or grayscale, color ink may be used instead of black ink, depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.

Parent topic: Refilling Ink

## **Checking Ink Levels on Your Product**

To confirm the actual ink levels, visually check the ink levels in the product's ink tanks. Make sure the ink levels are above the lower lines on the ink tanks.

Refilling the Ink Tanks

# **Disabling Special Offers with Windows**

You can disable special offers messages from Epson using a utility on your Windows computer.

**Note:** You may see the Epson Special Offers screen every time you print (if your computer is connected to the Internet). Select **Do not display this message again** and click **Decline** to disable online offers. Promotional offers are not valid in Latin America.

1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click. Select **Monitoring Preferences**. You see this window:

2. To disable promotional offers, deselect the **Display Epson Offers** checkbox.

Parent topic: Refilling Ink

# **Purchase Epson Ink**

You can purchase genuine Epson ink and paper from an Epson authorized reseller. To find the nearest reseller, visit latin.epson.com or call your nearest Epson sales office.

**Note:** This product is designed to work with genuine Epson inks. Non-Epson ink or any other ink not specified for this printer could cause damage not covered by Epson's warranties.

The ink bottles that are used for initial product setup have a lower yield due to the ink charging process. This process is carried out the first time you turn on the printer and guarantees better performance. Yields vary considerably based on print jobs, print settings, paper type, frequency of use, and temperature. Do not load paper before refilling the ink tanks.

Check the ink levels in your product frequently, and refill the ink tanks if necessary.

#### Ink Bottle Part Numbers

Parent topic: Refilling Ink

### **Ink Bottle Part Numbers**

Use these part numbers when you order or purchase new ink bottles, and use the ink by the date printed on the package:

Ink color	Part number
Black	T544120-AL
Cyan	T544220-AL
Magenta	T544320-AL
Yellow	T544420-AL

Ink Bottle Multipacks	Part number
Black (2 bottles)	T544120-2P
Cyan, magenta, and yellow (1 bottle each)	T544520-3P

Ink Bottle Multipacks	Part number
Black, cyan, magenta, and yellow (1 bottle each)	T544520-4P

**Note:** Availability of ink bottle multipacks varies by country.

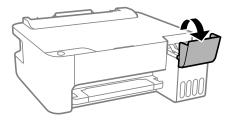

Parent topic: Purchase Epson Ink

# **Refilling the Ink Tanks**

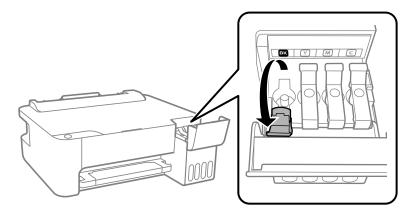

Make sure you have new ink bottles handy and have read the ink safety precautions before you begin. You can continue to use the product even if one or more ink tanks are not filled all the way.

**Caution:** Wear disposable gloves while refilling the ink tanks to avoid staining your hands. If ink spills, wipe it off immediately with a damp towel to avoid permanent stains. If ink gets on your clothes or belongings, it may not come off.

1. Open the ink tank cover.

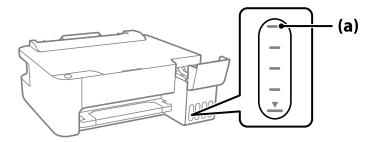

2. Open the cap for the ink tank you are going to fill.

Note: Make sure the color of the ink tank label matches the ink color you want to fill.

3. Check the upper line (a) in the ink tank.

a Upper line

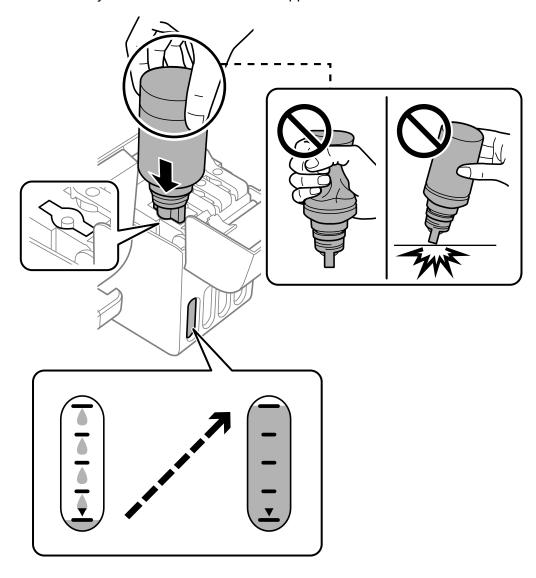

4. Hold the ink bottle upright and slowly turn the bottle cap to remove it.

**Caution:** Do not shake or squeeze the bottle. Do not touch the top of the bottle after removing its cap.

**Warning:** If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out and see a doctor right away. Seek medical advice if problems persist. Keep the ink bottles out of the reach of children and do not drink the ink.

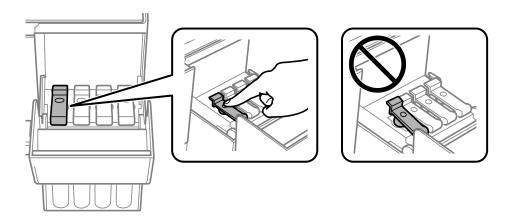

5. Place the top of the ink bottle on the filling port, then slowly stand the bottle upright to insert it, as shown. Wait for the ink to fill the tank. Do not squeeze the bottle. Ink flows into the tank and stops automatically when the ink is filled to the upper line.

**Note:** Do not force the bottles into position; they are keyed for each color.

**Note:** If ink does not flow from the bottle, lift and reinsert the bottle. However, do not remove and reinsert the ink bottle when the ink has reached the upper line; otherwise ink may leak.

6. When the ink tank is full, remove the ink bottle and securely close the ink tank cap as shown.

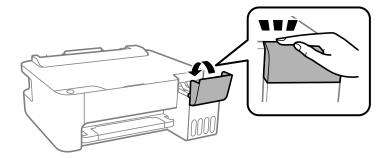

**Note:** If any ink remains in the bottle, replace the bottle cap and tighten it. Store the bottle upright for later use. Do not leave the ink bottle inserted; otherwise the bottle may be damaged or ink may leak.

7. Repeat the previous steps as necessary for each ink tank you need to fill.

### 8. Close the ink tank cover.

Refilling the Ink Tanks

### **Power Cleaning Using a Computer Utility**

You can run a Power Cleaning using a utility on your Windows or Mac computer.

**Note:** After running a Power Cleaning, you must turn off the product and wait at least 12 hours before running another Power Cleaning.

- 1. Make sure no product lights are indicating errors.
- 2. Load a few sheets of plain paper in the product.
- 3. Do one of the following:
  - **Windows**: Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click. Select **Printer Settings** and click the **Maintenance** tab.
  - Mac: In the Apple menu or the Dock, select System Preferences. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.
- 4. Select Power Cleaning.

#### You see a window like this:

- 5. Follow the on-screen instructions to run a Power Cleaning.
- 6. When Power Cleaning is finished, run a nozzle check.

If print quality has not improved after running Power Cleaning, wait for at least 12 hours without printing, and then print the nozzle check pattern again. Run Print Head Cleaning or Power Cleaning again depending on the printed pattern. If quality still does not improve, contact Epson support.

### Aligning the Print Head Using a Computer Utility

You can align the print head using a utility on your Windows or Mac computer.

- 1. Load a few sheets of plain paper in the product.
- 2. Do one of the following:
  - **Windows:** Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.
  - Mac: In the Apple menu or the Dock, select System Preferences. Select Print & Fax, Print & Scan, or Printers & Scanners, select your product, and select Options & Supplies. Select Utility and select Open Printer Utility.
- 3. Select Print Head Alignment.
- 4. Click **Next**, then click **Print** to print an alignment sheet.

**Note:** Do not cancel printing while you are printing a head alignment pattern.

#### You see a window like this:

5. Check the printed pattern and follow the instructions on the screen to choose the number of the best printed pattern for each set.

### Vertical alignment

### Horizontal alignment

- After choosing a pattern number, click Next.
- If no patterns are aligned in one or more of the sets, choose the closest one in each set and click **Realignment**. Then print another alignment sheet and check it.

Note: Click Skip (where available) if you want to skip a particular alignment sheet.

6. When you are done, click **Finish**.

# **Cleaning and Transporting the Product**

If your product gets dirty or you need to move it some distance, follow the instructions in these sections.

Cleaning Your Product
Transporting Your Product

## **Cleaning Your Product**

To keep your product working at its best, you should clean it several times a year.

Close the output tray and paper support when you are not using the product to protect it from dust.

**Caution:** Do not use a hard brush, benzene, alcohol, or paint thinner to clean the product or you may damage it. Do not place anything on top of the cover or use the cover as a writing surface, or it could get permanently scratched. Do not use oil or other lubricants inside the product or let water get inside.

- 1. Turn off the product.
- 2. Unplug the power cable.
- 3. Disconnect any connected cables.
- 4. Remove all the paper.
- 5. Clean the outer case with a soft, clean cloth that has been dampened with water. If you cannot remove the dirt, try adding a small amount of mild soap to the damp cloth.

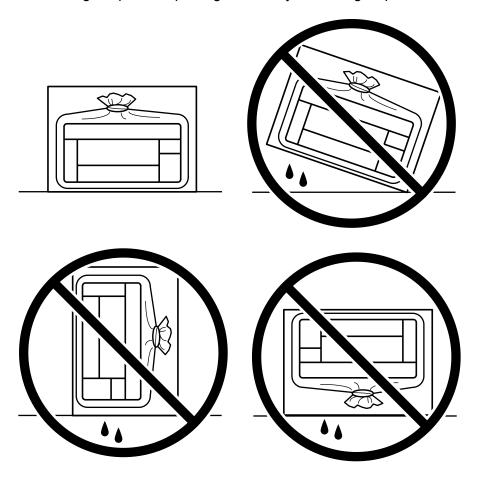

Parent topic: Cleaning and Transporting the Product

## **Transporting Your Product**

If you need to store your product or transport it some distance, prepare it for transportation as described here.

**Caution**: During transportation and storage, follow these guidelines:

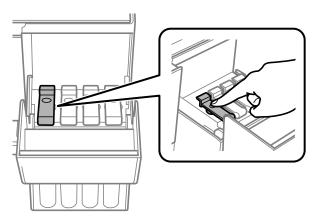

• Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.

 When storing or transporting an ink bottle after removing its seal, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when transporting the ink bottles. • Do not put opened ink bottles in the box with the product.

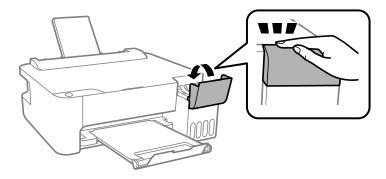

- 1. Turn off the product.
- 2. Open the front cover and check to see if the print head is in the far right position (the home position). If not, turn on the product, wait for the print head to move to the far right, then turn the product off again.
- 3. Unplug the power cable.
- 4. Disconnect any connected cables.
- 5. Remove all the paper.
- 6. Open the ink tank cover and make sure that the ink tank caps are securely closed as shown.

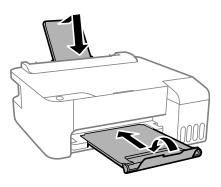

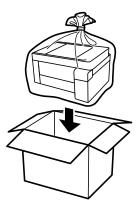

## 7. Close the ink tank cover.

# 8. Close the paper support and output tray.

9. Place the product in a plastic bag and fold it closed. Pack the product in its box with protective materials.

If print quality has declined when you print again, clean and align the print head.

## **Checking for Software Updates**

Periodically, it's a good idea to check Epson's support website for free updates to your product software. Visit latin.epson.com/support and select your product.

- Windows: Your printer software automatically checks for updates. You can also manually update the software by selecting Software Update here:
  - Access the Windows Desktop and right-clicking the icon for your product in the right side of the Windows taskbar, or clicking the up arrow and right-clicking.
  - On the Maintenance tab in the printer settings window

You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **EPSON Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.

- OS X: You can manually update the software by opening the Applications > Epson Software folder and selecting EPSON Software Updater.
- macOS 10.12.x to 11.x: You can manually update the software by opening the App Store, selecting Updates, searching for a software update option for Epson Software, and selecting Update.

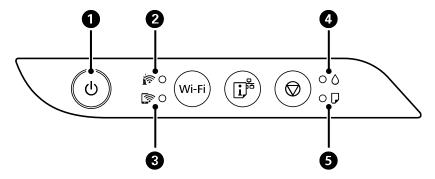

Parent topic: Solving Problems

### Related tasks

**Changing Automatic Update Options** 

# **Product Light Status**

You can often diagnose problems with your product by checking its lights.

- 1 U power light
- 2 🔊 Wi-Fi light
- 3 S Wi-Fi Direct light
- 4 0 ink light
- 5 □ paper light

Light status	Condition/solution
The <sup>ひ</sup> power light is on	The product is turned on.
The U power light is flashing	The product is busy. Wait for the $\circlearrowleft$ power light to stop flashing before turning off the product.
The Ó ink light is on	Initial ink charging may not be complete. See the <i>Start Here</i> sheet for instructions.
The □ paper light is on	No paper is loaded or multiple sheets fed at one time. Load paper in the product, and press the $\bigcirc$ stop button to clear the error.

Light status	Condition/solution
The ☑ paper light is flashing	Paper is jammed in the product. Remove the jammed paper, and press the $\bigcirc$ stop button to clear the error. If the $\bigcirc$ paper light is still flashing, turn the product off and then back on again. If the error continues, load letter- or A4-size paper in the rear paper feed, and then press the $\bigcirc$ stop button to remove the paper inside. If the error cannot be cleared, contact Epson for support.
The ປ power light is on or flashing	The product was not turned off correctly. Press the ♥ stop button to clear the error, then perform a nozzle check and cancel any pending print jobs. Use the ὑ power button to turn the product off.
The ∆ ink light is on	
The $\square$ paper light is on	
The ∪ power light is off	An error has occurred during firmware updating. Connect your product using a USB cable and try updating the firmware again. If the error continues, contact Epson for support.
The ∆ ink light is on	
The $\square$ paper light is on	
The 🏟 Wi-Fi and 🖨 Wi-Fi Direct lights are on	
The 🏟 Wi-Fi and 🕼 Wi-Fi Direct lights are flashing	A Wi-Fi connection error has occurred. Press the <b>Wi-Fi</b> button to clear the error and try again.
The ∆ ink and □ paper lights are flashing simultaneously	An ink pad is nearing or at the end of its service life. Contact Epson for support. If a message to continue printing appears on your computer, press the $\bigcirc$ stop button to continue printing.
The ∆ ink and D paper lights are flashing alternately	A borderless printing ink pad is nearing or at the end of its service life. Contact Epson for support. If a message to continue printing appears on your computer, press the $\bigcirc$ stop button to continue printing. Borderless printing is not available until the ink pad is replaced.
All lights are flashing	Paper or protective material is stuck inside the product. Open the front cover and remove any jammed paper or protective materials. Turn the product off and then back on again. If the error continues, contact Epson for support.

**Note:** The ink pads in the printer collect, distribute, and contain the ink that is not used on printed pages. During the life of your product it may reach a condition where either satisfactory print quality cannot be maintained or the ink pads have reached the end of their usable life. The Epson Status Monitor, your LCD screen, or lights on the control panel will advise you when these parts need replacing. If this

happens during the standard warranty of the product, the exchange of the product or replacement of the pads is covered under the standard warranty. If the product is out of warranty, the pads can be replaced by any Epson authorized service provider. The waste ink pads are not a user-replaceable part.

## **Running a Product Check**

Running a product check helps you determine if your product is operating properly.

- 1. Press the O power button to turn the product off.
- 2. Load a few sheets of plain paper in the product.
- 3. Hold down the  $\bigcirc$  stop button and press the  $\bigcirc$  power button to turn the product on.

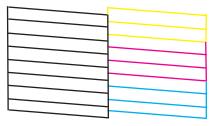

4. When the product turns on, release both buttons.

The product begins printing a nozzle check pattern.

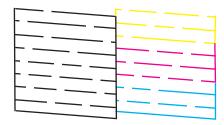

**Note:** It can take a few seconds for the nozzle check pattern to start printing. If it does not start printing after a few seconds, make sure there is paper loaded in the product.

5. Check the printed pattern to see if there are gaps in the lines.

#### Print head is clean

#### Print head needs cleaning

- 6. Do one of the following, depending on the results of the product check:
  - If the page prints and the nozzle check pattern is complete, the product is operating properly. Any
    operation problem you may have could be caused by your computer, cable, software, or selected
    settings. Check the other solutions in this book or try uninstalling and reinstalling your printer
    software.
  - If the page prints but the nozzle check pattern has gaps, clean or align the print head.
  - If the page prints but almost the entire nozzle check pattern is missing, perform a Power Cleaning.
  - If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

Product Does Not Turn On or Off Noise After Filling the Ink Software Installation Problems

Parent topic: Solving Problems

#### **Product Does Not Turn On or Off**

If you cannot turn the product on or off, try these solutions:

- If you cannot turn on your product, make sure the power cord is securely connected and hold down the power button a little longer.
- If you cannot turn off your product, hold down the power button a little longer. If you still cannot turn off your product, unplug the power cord, plug the power cord back in, then turn your product on and off again using the power button.

Parent topic: Solving Setup Problems

## Noise After Filling the Ink

If you hear noises from your product after filling the ink tanks with ink, check these explanations:

- The first time you fill the tanks with ink, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on. Your product is finished charging the print head when the  $\circlearrowleft$  power light stops flashing.
- If the product's  $\Diamond$  ink light is on, the charging process may not be complete. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on.

• If the product's print head stops moving or making noise, and the charging process has not finished after approximately 20 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Parent topic: Solving Setup Problems

Related tasks

Refilling the Ink Tanks

#### **Software Installation Problems**

If you have problems while installing your product software, try these solutions:

- Make sure your product is turned on and any necessary cables are securely connected at both ends. If
  you still have problems installing software, disconnect the cable and carefully follow the instructions on
  the Start Here sheet. Also make sure your system meets the requirements for your operating system.
- Close any other programs, including screen savers and virus protection software, and install your product software again.
- In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.
- If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your system administrator.
- If you are printing over a network, make sure your product is set up properly on the network.
- If the USB cable is not recognized, try using a different USB cable.

## **Solving Network Problems**

Check these solutions if you have problems setting up or using your product on a network.

**Note:** Breakdown or repair of this product may cause loss of network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your network data and settings.

Product Cannot Connect to a Wireless Router or Access Point Network Software Cannot Find Product on a Network Product Does Not Appear in Mac Printer Window Wireless Network Connection is Unstable on a Mac Cannot Print Over a Network

Parent topic: Solving Problems

#### Product Cannot Connect to a Wireless Router or Access Point

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi light on your product is not solid green, make sure you press the Wi-Fi button on the product within 2 minutes of pressing the WPS button on your router. Hold down the Wi-Fi button on the product for 3 seconds.
- Make sure to place your product within contact range of your 2.4 GHz router or access point. Avoid
  placing your product near a microwave oven, 2.4 GHz cordless phone, or large metal object, such as a
  filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Verify that your router or access point is operating correctly by connecting to it from your computer or another device.
- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.
- You may need to disable the firewall and any anti-virus software on your wireless router or access point.
- Try restarting your router following the instructions in your router documentation.

**Note:** If you are reading these instructions online, you will lose your Internet connection when you restart your router.

- Check to see if access restrictions, such as MAC address filtering, are set on the router or access
  point. If access restrictions are set, add your product's MAC address to your router's address list. To
  obtain your product's MAC address, print a network status sheet. Then follow the instructions in your
  router or access point documentation to add the address to the list.
- If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.
- If your router or access point has security enabled, determine the kind of security it is using and any
  required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA
  passphrase correctly.
- Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.
- Turn off the devices you want to connect to the network. Wait for about 10 seconds and then turn on the devices in the following order: wireless router, computer or smart device, and then your product. Move your product and computer or smart device closer to the wireless router to help with radio wave communication, and then try to make network settings again.
- If the IP address assigned to the product is 169.254.XXX.XXX and the subnet mask is 255.255.0.0, the IP address may not be assigned correctly. Check the IP address and the subnet mask assigned to the product. Restart the wireless router or reset the network settings for the product.
- If you cannot connect your product to a device using Wi-Fi Direct, you may have exceeded the maximum number of devices connected to your product (8). Print a network status sheet or access Web Config on the browser for your device and check the number of connected devices. If 8 devices are already connected, disconnect a device by deleting the product's SSID from the Wi-Fi screen of that device. If fewer than 8 devices are connected, check the accuracy of your other network settings, move your device closer to your product, and try connecting again.
- If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi direct password on your device may have been changed. If necessary, delete the existing **DIRECT-xxxxxxxx** connection settings from your device and enter a new password. See your device documentation for instructions.
- If you connected your product to a Windows computer using Wi-Fi Direct and it automatically selected Access Point Mode, you may have trouble accessing a low-priority Internet connection. Check the network connection or adapter settings in the Windows Control Panel and set the Internet metric setting to 100 for your version of the Internet Protocol.

Parent topic: Solving Network Problems

#### **Network Software Cannot Find Product on a Network**

If EpsonNet Setup cannot find your product on a network, try these solutions:

- Make sure your product is turned on and connected to your network. Verify the connection using your product control panel.
- Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.
- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.
- Make sure your product is not connected to a guest network.
- If necessary, reinstall your product software and try running EpsonNet Setup again:
  - Reset your product's network settings to their factory defaults.
  - 2. Windows only: Uninstall your product software.
  - 3. Restart your router following the instructions in your router documentation.

**Note:** If you are reading these instructions online, you will lose your Internet connection when you restart your router, so note the next step before restarting it.

- 4. Download your product software from the Epson website using the instructions on the *Start Here* sheet.
- If you have replaced your router, reinstall your product software to connect to the new router.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Check to see if your wireless router or access point has an enabled Privacy Separator function that is
  preventing detection of your device over the network. See your router or access point documentation
  for instructions on disabling the Privacy Separator function.
- Try accessing any website from your computer to make sure that your computer's network settings are correct. If you cannot access any website, there is a problem on the computer. Check the network connection of the computer. See the documentation provided with the computer for details.

Parent topic: Solving Network Problems

## **Product Does Not Appear in Mac Printer Window**

If your product does not appear in the Mac printer window, try these solutions:

- Turn your product off, wait 30 seconds, then turn it back on again.
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi light on your product is not solid green, make sure you press the **Wi-Fi** button on the product within 2 minutes of pressing the WPS button on your router. Hold down the **Wi-Fi** button on the product for 3 seconds.
- If you are connecting the product wirelessly via EpsonNet Setup and the Wi-Fi light on your product is not solid green, make sure your product software was installed correctly. If necessary, reinstall your software.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

Parent topic: Solving Network Problems

#### Wireless Network Connection is Unstable on a Mac

If you connected a device to a USB 3.0 port on your Mac, you may experience wireless network interference between your product and your Mac.

If you cannot connect to your product over the wireless network or the connection becomes unstable, move the device connected to your Mac USB 3.0 port further away from your Mac.

Parent topic: Solving Network Problems

#### **Cannot Print Over a Network**

If you cannot print over a network, try these solutions:

- · Make sure that your product is turned on.
- Make sure you install your product's network software as described in your product documentation.
- Make sure that the latest version of your product's Epson printer driver is installed. If a genuine Epson printer driver is not installed, the available functions are limited.
- Print a network status sheet and verify that the network settings are correct. If the network status is **Disconnected**, check any cable connections and turn your product off and then on again.
- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.

- If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.
- Make sure your computer and product are both using the same wireless network.
- If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, cordless phone, or large metal object, such as a filing cabinet.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

• Try restarting your router following the instructions in your router documentation.

**Note:** If you are reading these instructions online, you will lose your Internet connection when you restart your router.

- Check to see if your wireless router or access point has an enabled Privacy Separator function that is
  preventing printing from a device over the network. See your router or access point documentation for
  instructions on disabling the Privacy Separator function.
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi light on your product is not solid green, make sure you press the Wi-Fi button on the product within 2 minutes of pressing the WPS button on your router. Hold down the Wi-Fi button on the product for 5 seconds or until the Wi-Fi and Wi-Fi Direct lights start blinking.
- Check your product's connection status by opening the EPSON Status Monitor 3 (Windows) or EPSON Status Monitor (Mac) on your computer. If the remaining ink levels are displayed, a connection has been successfully established between your computer and your product.
- If you are printing a large data size image, the computer may run out of memory. Print the image at a lower resolution or a smaller size.

Parent topic: Solving Network Problems

## **Solving Paper Problems**

Check these sections if you have problems using paper with your product.

Paper Feeding Problems
Paper Jam Problems

#### Paper Ejection Problems

Parent topic: Solving Problems

## **Paper Feeding Problems**

If you have problems feeding paper, try these solutions:

- Place the product on a flat surface.
- If paper does not feed for printing, remove it. Then reload it in the middle of the rear paper feed. Slide the edge guide against the edge of the paper, making sure that the paper stack is not above the arrow mark on the edge guide.
- If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
- If multiple pages feed at once during manual 2-sided printing, remove any paper from the product before reloading paper.
- If paper jams when you load only one or two sheets, try loading more sheets at a time. Do not load more than the recommended number of sheets.
- Do not load more than the recommended number of sheets.
- If paper jams when you print on both sides of the paper, try loading fewer sheets.
- Make sure your paper meets the specifications for your product.
- Try cleaning the paper path.
- For best results, follow these guidelines:
  - Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
  - · Load paper in the rear paper feed printable side up.
  - Follow any special loading instructions that came with the paper.

Parent topic: Solving Paper Problems

#### Related tasks

Loading Paper in the Rear Paper Feeder Cleaning the Paper Path

## **Paper Jam Problems**

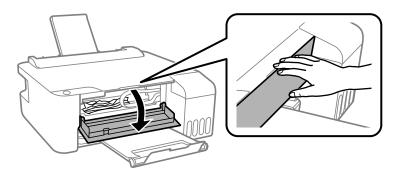

If you have problems with paper jams, try these solutions:

- 1. Cancel the print job from your computer, if necessary.
- 2. Gently pull out any jammed paper from the rear paper feed slot.

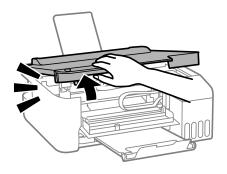

**Note:** When removing jammed paper, avoid tilting the printer, placing it vertically, or turning it upside down; otherwise ink may leak.

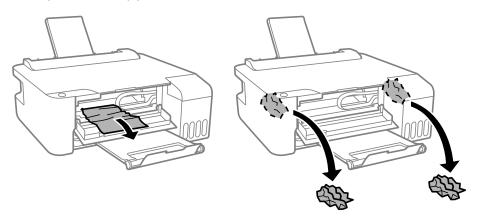

3. Open the front cover.

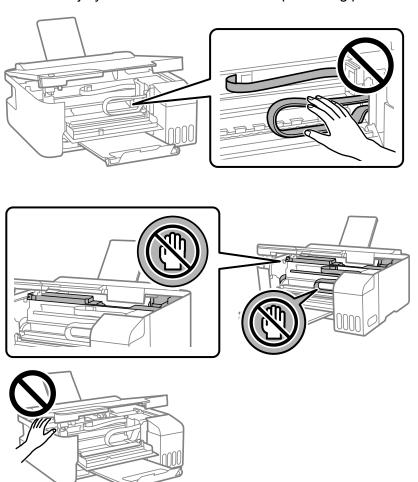

4. Open the printer cover until it clicks.

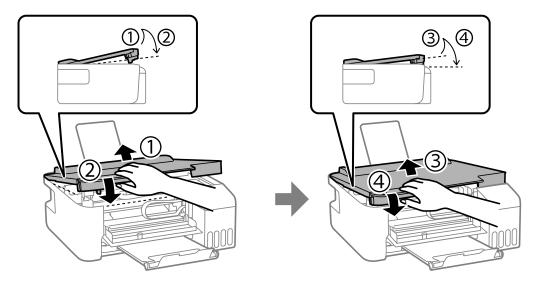

5. Gently remove any jammed paper.

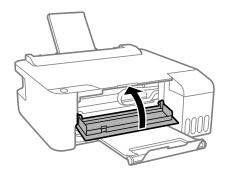

**Caution:** Do not touch the parts shown here or you may damage the product. Never touch the buttons on the control panel while your hand is inside the printer. If the printer starts operating, it could cause an injury. Be careful not to touch the protruding parts to avoid injury.

### 6. Close the printer cover.

#### 7. Close the front cover.

## 8. Carefully follow all paper loading instructions when you load new paper.

**Note:** If the paper jam error continues after removing the paper and turning the power off and on again, paper may remain inside the printer. Load letter- or A4-size paper in the rear paper feed, and then press the  $\bigcirc$  stop button to remove the paper inside. If the error cannot be cleared, contact Epson support.

Parent topic: Solving Paper Problems

## **Paper Ejection Problems**

If you have problems with paper ejecting properly, try these solutions:

- If paper does not eject fully, you may have set the wrong paper size. Cancel printing using the product control panel, then press the ♥ stop button to eject the paper. Remove any paper remaining in the product. Select the correct size when you reprint.
- If paper is wrinkled when it ejects, it may be damp or too thin. Load new paper and be sure to select the correct paper type setting in your printer software when you reprint.

## **Nothing Prints**

If you have sent a print job and nothing prints, try these solutions:

- Make sure your product is turned on and connected to your computer.
- Make sure any interface cables are connected securely at both ends.
- If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
- If the printer cannot print using a USB connection, disconnect the USB cable from the computer, rightclick on the printer icon displayed on the computer, and select **Remove Device**. Then connect the USB cable to the computer and try a test print.

- If your computer is connected using a USB cable, try a different USB port on your computer or a
  different cable.
- Make sure the printer status is not offline or pending.
- Make sure you are using the Epson printer driver for your product or the available functions are limited.
- Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. Print the image at a lower resolution or if necessary, increase your system's memory.
- In Windows, make sure your product is selected as the default printer and the printer port setting matches the printer connection port.
- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
- In Windows, do one of the following to open the Epson Printer Connection Checker and follow the onscreen instructions to check the connection status:
  - Windows 11: Click , then search for Epson Printer Connection Checker and select it.
  - Windows 10: Click and select Epson Software > Epson Printer Connection Checker.
  - Windows 8.x: Navigate to the Apps screen and select the Epson Printer Connection Checker icon.
  - Windows 7: Click and select All Programs > Epson Software > Epson Printer Connection Checker.
- On a Mac, make sure the printer is added to the printer list and the printer is not paused.
- Make sure your product is selected as the printer in your printing program.

Running a Product Check

## **Product Icon Does Not Appear in Windows Taskbar**

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

- 1. Do one of the following:
  - Windows 11: Click , search for Settings and select it. Select Bluetooth & devices > Printers & scanners. Select your product name and select Printing preferences.
  - Windows 10: Click and select (Settings) > Devices > Printers & scanners. Select your product name and select Manage > Printing preferences.
  - Windows 8.x: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
  - Windows 7: Click and select Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
  - Windows Vista: Click , select Control Panel, and click Printer under Hardware and Sound. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
- 2. Click the Maintenance tab.
- 3. Click the **Extended Settings** button.
- 4. Select Enable EPSON Status Monitor 3 and click OK.
- 5. Click the **Monitoring Preferences** button.
- 6. Click the checkbox for the option that adds the shortcut icon to the taskbar.
- 7. Click **OK** to close the open program windows.

Parent topic: Solving Problems Printing from a Computer

## **Printing is Slow**

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the **Devices and Printers** window before you print.

- On a Mac, make sure you download and install the Epson printer driver.
- Make sure Quiet Mode is turned off.
- Clear space on your hard drive or run a defragmentation utility to free up existing space.
- Close any programs you are not using when you print.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.
- If you are printing over a wireless network, factors such as interference, network traffic, or weak signal strength may affect your printing speed.

**Note:** If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

For the fastest printing, select the following settings in your product software:

- Make sure the paper type setting matches the type of paper you loaded.
- Turn on any high speed settings in your product software.
- · Select a lower print quality setting.
- Windows: Click the Maintenance or Utility tab, select Extended Settings or Speed and Progress, and select the following settings:
  - Always Spool RAW Datatype
  - Page Rendering Mode
  - Print as Bitmap
- Windows: Select Printing preferences, click the More Options tab, and make sure the Bidirectional printing setting is enabled.
- Mac: Select System Preferences, select Printers & Scanners, and select your product. Select Options & Supplies, select Options (or Driver), and enable the Bidirectional printing setting.

If printing is still slow and you are using Windows 7 or Windows Vista, try the following:

1. Click and select Computer or My Computer. Double-click the C: drive and open these folders: ProgramData > EPSON > PRINTER.

**Note:** If you do not see the ProgramData folder, open the **Organize** menu and select **Folder and search options**. In the window that appears, click the **View** tab, select **Show hidden files, folders, and drives** in the Advanced settings list, and click **OK**.

- 2. Right-click the **EPAUDF01.AUD** file and select **Delete**.
- 3. Restart your computer and try printing again.

## **Too Many Copies Print**

Make sure that the **Copies** setting in your printing program or printer software is not set for multiple copies.

**Parent topic:** Solving Page Layout and Content Problems

## **Blank Pages Print**

If blank pages print unexpectedly, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- If a blank page exists in a document you are printing and you want to skip printing it, select the **Skip Blank Page** setting in your printer software, if available.
- Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
- Make sure your product is selected as the printer in your printing program.
- You may need to refill the ink. Visually check the ink levels.

Checking Ink Levels on Your Product

## **Incorrect Margins on Printout**

If your printed page has incorrect margins, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- Make sure you selected the correct margins for your paper size in your printing program.
- · Make sure your paper is positioned correctly for feeding into the product.
- Load paper in the correct direction and slide the edge guides against the edges of the paper.

You can use the preview option in your printer software to check your margins before you print.

### **Border Appears on Borderless Prints**

If you see a border on borderless prints, try these solutions:

- Make sure you are printing on a compatible borderless paper type and size.
- Windows: Make sure you selected the Borderless setting in your printer software.
- Mac: Make sure you selected the **Borderless** checkbox or a paper size with a **Borderless** option in your printer software.
- Adjust the Expansion setting to adjust the amount of image expansion on the edges of borderless prints.

- Make sure the image size and the paper size are set correctly; if the image is small, the enlargement may not be enough to cover the paper.
- Make sure you have stored the paper correctly. Paper can expand or contract if it is not stored properly. See the instructions that came with your paper for storage instructions.

#### **Incorrect Characters Print**

If incorrect characters appear in your prints, try these solutions before reprinting:

- Make sure any cables are securely connected at both ends.
- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If incorrect characters still appear in your prints, try connecting your product using a different cable.
- If your computer entered sleep mode the last time you printed, the next print job after your computer exits sleep mode may contain garbled characters. Print your document again.
- Make sure you are using the printer software for this product. Check the product name at the top of the driver window.

## **Incorrect Image Size or Position**

If your printed image is the wrong size or in the wrong position, try these solutions:

- Make sure you selected the correct paper size and layout settings in your printing program and printer software.
- Make sure your paper is positioned correctly for feeding into the printer.
- Slide the edge guides against the edges of the paper.
- Make sure you selected the correct margins for your paper size in your printing program.
- If the image is slightly enlarged and cropped during borderless printing, change the **Expansion** setting.

You can use the preview option in your printer software to check your margins before you print.

### **Slanted Printout**

If your printouts are slanted, try these solutions:

- Make sure the paper is loaded in the correct direction.
- Make sure your paper meets the specifications for your product.
- Do not load more than the recommended number of sheets.
- Slide the edge guides against the edges of the paper.
- Make sure the paper type setting matches the type of paper you loaded.
- Select a higher print quality setting in your printer software.
- Turn off any high speed settings in your product software.
- · Align the print head.
- Adjust the print quality.

Make sure the product is not printing while tilted or at an angle.

## **Solving Print Quality Problems**

Check these sections if your printouts have problems with print quality, but your image looks fine on your computer screen.

White or Dark Lines in Printout Blurry or Smeared Printout Faint Printout or Printout Has Gaps Grainy Printout Incorrect Colors

Parent topic: Solving Problems

### White or Dark Lines in Printout

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure you loaded the printable side of the paper correctly for your product.
- Turn off any high speed settings in your product software.
- Align the print head. If print quality does not improve after aligning the print head, disable the bidirectional (high speed) setting.
- Adjust the print quality in the product software.
- When horizontal banding appears or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.
- When vertical banding appears or the paper is smeared, clean the paper path.

- You may need to refill the ink. Visually check the ink levels.
- If you have not used the product for a long time, run the Power Cleaning utility.

**Note:** Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

## **Blurry or Smeared Printout**

If your printouts are blurry or smeared, try these solutions:

- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Slide the edge guides to the edges of the paper.
- Use a support sheet with special paper, or load special paper one sheet at a time.
- Make sure your paper meets the specifications for your product.
- Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
- Do not load more than the recommended number of sheets. For plain paper, do not load above the line indicated by the triangle symbol on the edge guide.
- Make sure the paper type setting in your product software matches the type of paper you loaded.

- Make sure you loaded the printable side of the paper correctly for your product.
- If you are printing on thick paper or envelopes, make sure you select the appropriate settings. In Windows, you can also try selecting **Short Grain Paper** in Extended Settings.
- When manually printing 2-sided, make sure the ink is completely dry before loading the paper.
- Remove each sheet from the output tray as it is printed.
- Avoid handling printouts on glossy paper right after printing to allow the ink to set.
- When vertical banding appears or the paper is smeared, clean the paper path.
- When horizontal banding appears or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.
- If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Make sure the ink has dried before reloading the paper to print on the other side. Adjust the density and/or ink drying time settings.
- The ink levels may be low and you may need to refill the ink. Visually check the ink levels.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- · Align the print head.
- Adjust the print quality in the product software.
- Clean the paper path.
- If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and run the Power Cleaning utility. Then run a nozzle check to see if print quality has improved.
- If you have not used the product for a long time, run the Power Cleaning utility.

**Note:** Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

**Note:** Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

### **Faint Printout or Printout Has Gaps**

If your printouts are faint or have gaps, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- If any ink levels are below the lower line, refill the ink tanks.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Align the print head.
- Adjust the print quality in the product software.
- Clean the paper path.
- If you have not used the product for a long time, run the Power Cleaning utility.

**Note:** Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

 If you cannot solve the problem using head cleaning, you can print immediately from a Windows computer with a mixture of color inks to create composite black. Select the Use a Mixture of Color Inks to Create Black setting from Extended Settings on the printer driver's Maintenance tab. You can print at Standard print quality when the Paper Type is Plain Paper / Bright White Paper, Letterhead, or Envelope.

### **Grainy Printout**

If your printouts are grainy, try these solutions:

- Make sure you loaded the printable side of the paper correctly for your product.
- Select a higher print quality setting and turn off any high speed settings in your product software.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head.
- Adjust the print quality in the product software.
- You may need to increase the image resolution or print a smaller size; see your software documentation.

**Note:** Images from the Internet may be low resolution and not result in a high quality printout.

 If you enlarged the image size in an image-editing program, you need to increase the image resolution setting to retain a high image quality. Increase the image resolution by the same amount you increase the image size. For example, if the image resolution is 300 dpi (dots per inch) and you will double the image size for printing, change the resolution setting to 600 dpi.

**Note:** Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

#### **Incorrect Colors**

If your printouts have incorrect colors, try these solutions:

- Make sure the paper type setting matches the paper you loaded.
- Make sure the Black/Grayscale or Grayscale setting is not selected in your printer software.
- If you selected **Standard-Vivid** (Windows) or **Normal-Vivid** (Mac) as the quality setting in the printer software, try selecting **Standard** (Windows) or **Normal** (Mac) instead.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink levels may be low and you may need to refill the ink. Visually check the ink levels.
- If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to
  the upper lines and run the Power Cleaning utility. Then run a nozzle check to see if print quality has
  improved.

- After you print, the colors in your printout need time to set as the ink dries. During this time, the colors
  may look different than you expect. To speed up drying time, do not stack your printouts on top of each
  other.
- Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
- Select Custom as the Color Correction setting on the More Options tab of the printer software, then click Advanced. Try selecting a different Color Management setting.
- For best results, use genuine Epson paper.
- If you have not used the product for a long time, run the Power Cleaning utility.

**Note:** Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

#### **Uninstall Your Product Software**

If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Printing Software - Windows Uninstalling Product Software - Mac

Parent topic: Solving Problems

### **Uninstalling Printing Software - Windows**

You can uninstall and then re-install your printer software to solve certain problems.

- 1. Turn off the product.
- 2. Disconnect any interface cables.
- 3. Do one of the following:
  - Windows 11: Click then search for Settings and select it. Select Apps or System > Apps & features. Then select the program you want to uninstall and select Uninstall.
  - Windows 10: Click and select (Settings) > Apps > Apps & features. Select the program you want to uninstall and select Uninstall.
  - Windows 8.x: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.

Note: If you see a User Account Control window, click Yes or Continue.

In the next window, select your product, if necessary, and click **OK**. Then follow any on-screen instructions.

• Windows (other versions): Click or Start, and select All Programs or Programs. Select Epson, select your product, then click EPSON Printer Software Uninstall.

Note: If you see a User Account Control window, click Yes or Continue.

In the next window, select your product, if necessary, and click **OK**. Then follow any on-screen instructions.

4. Restart your computer, then re-install your software.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

Parent topic: Uninstall Your Product Software

### **Uninstalling Product Software - Mac**

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

**Note:** If you find that re-installing your product software does not solve a problem, contact Epson.

- 1. To download the Uninstaller utility, visit latin.epson.com/support and select your product.
- 2. Click Downloads.
- 3. Select your operating system, click **Utilities**, locate the Uninstaller utility, and click **Download**.
- 4. Run the file you downloaded.
- Double-click the **Uninstaller** icon.
- 6. In the Epson Uninstaller screen, select the checkbox for each software program you want to uninstall.
- 7. Click Uninstall.
- 8. Follow the on-screen instructions to uninstall the software.
- 9. Reinstall your product software.

**Note:** If you uninstall the printer driver and your product name remains in the **Print & Fax**, **Print & Scan**, or **Printers & Scanners** window, select your product name and click the – (remove) icon to remove it.

Parent topic: Uninstall Your Product Software

## Where to Get Help

If you need additional help with your Epson product, contact Epson.

Epson provides these technical support services:

#### **Internet Support**

Visit Epson's support website at <u>latin.epson.com/support</u> for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

#### **Speak to a Support Representative**

Before you call Epson for support, please have the following information ready:

- Product name
- Product serial number (located on a label on the product)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- Description of the problem

#### Then call:

### **Ink Specifications**

**Note:** This product is designed to work with genuine Epson inks. Non-Epson ink or any other ink not specified for this printer could cause damage not covered by Epson's warranties.

The ink bottles that are used for initial product setup have a lower yield due to the ink charging process. This process is carried out the first time you turn on the printer and guarantees better performance. Yields vary considerably based on print jobs, print settings, paper type, frequency of use, and temperature. Do not load paper before refilling the ink tanks.

Check the ink level in your product frequently, and refill the ink tanks if necessary.

**Color** Cyan, Magenta, Yellow, Black

Ink life Opened package: use as soon as possible

Unopened package: do not use if the date on the package has

expired

**Temperature** Storage: –4 to 104 °F (–20 to 40 °C)

1 month at 104 °F (40 °C) Ink freezes at 5 °F (–15 °C)

Ink thaws and is usable after approximately 2 hours at 77 °F (25 °C)

### **Important Safety Instructions**

Before using your Epson product, read and follow these safety instructions.

**General Printer Safety Instructions** 

**Parent topic: Notices** 

### **General Printer Safety Instructions**

- Be sure to follow all warnings and instructions marked on the printer.
- Use only the type of power source indicated on the printer's label.
- Use only the power cord that comes with the printer. Use of another cord may cause fires or shock. Do
  not use the cord with any other equipment.
- Make sure the AC power cord meets the relevant local safety standard.
- Place the printer near a wall outlet where the plug can be easily unplugged.
- Avoid plugging the printer into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
- Do not let the power cord become damaged or frayed.
- If you use an extension cord with the printer, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- Always turn off the printer using the power button, and wait until the power light stops flashing before
  unplugging the printer or cutting off power to the electrical outlet.
- Place the printer on a flat, stable surface that extends beyond its base in all directions. It will not
  operate properly if it is tilted or at an angle.

- Keep your product at least 8.7 inches (22 cm) away from cardiac pacemakers to prevent your product's radio waves from affecting the operation of the pacemaker.
- Leave enough space in front of the printer for the paper to be fully ejected.
- · Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.
- Do not place the printer near a radiator or heating vent or in direct sunlight.
- Leave enough room around the printer for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.
- Keep the printer away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.
- When connecting the printer to a computer or other device with a cable, ensure the correct orientation
  of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong
  orientation may damage both devices connected by the cable.
- Do not put your hand inside the printer while it is printing.
- Do not touch the flat white cable inside the printer.
- Do not move the print head by hand; this may damage the printer.
- Do not spill liquid on the printer and do not handle the printer with wet hands.
- Do not use aerosol products that contain flammable gases inside or around the printer. Doing so may cause fire.
- Except as specifically explained in your documentation, do not attempt to service the printer yourself.
- Unplug the printer and refer servicing to qualified service personnel under the following conditions: if
  the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped
  or the case damaged; if the product does not operate normally or exhibits a distinct change in
  performance. Adjust only those controls that are covered by the operating instructions.
- If damage occurs to the plug, replace the cord set or consult a qualified electrician. If there are fuses in the plug, make sure you replace them with fuses of the correct size and rating.
- Unplug the power cord from the electrical outlet if you are not going to use the printer for an extended period.
- Before transporting the printer, make sure that the print head is in the home (far right) position.
- When storing or transporting the printer, do not tilt it, stand it on its side, or turn it upside down; otherwise, ink may leak.
- Some users that print extensively may receive a message informing them that the ink waste pad is full. The duration of the pad depends on the amount of use and usage conditions such as high humidity,

heat or dusty conditions that require more cleaning cycles. The Epson Status Monitor and warning light on the control panel will indicate when the waste pad needs to be replaced. The ink pad is not a user serviceable part. Please seek service from an Epson Authorized Service Center or consider a new printer if your printing needs have changed or the printer has had a long period of extensive use.

### **FCC Compliance Statement**

#### For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

#### **WARNING**

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

#### For Canadian Users

## **Binding Arbitration and Class Waiver**

# 1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS

- 1.1 **Disputes**. The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.
- 1.2 Binding Arbitration. You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED. Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.
- 1.3 **Pre-Arbitration Steps and Notice**. Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days), you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3131 Katella Ave., Los Alamitos, CA 90720 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.
- 1.4 **Small Claims Court**. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

- 1.5 WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.
- 1.6 **Arbitration Procedure**. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at https://www.jamsadr.com/about/ or by calling +1-949-224-1810 (from outside the U.S.) or 1-800-352-5267 (from within the U.S.), and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

- a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:
- (i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at <a href="http://www.jamsadr.com">http://www.jamsadr.com</a> ("Demand for Arbitration").
- (ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

- (iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.
- b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.
- c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.
- d) Award in Your Favor. For Disputes in which you or Epson seeks \$75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you \$1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).
- e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.
- 1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.
- 1.8 **Amendments to Section 1**. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson's address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.

### **Default Delay Times for Power Management for Epson Products**

This product enters sleep mode after a period of nonuse. You can adjust the time period before power management begins, but increasing the time reduces the product's energy efficiency. Energy savings can be achieved by setting the time to sleep to a shorter interval.
