About the Guide

- This quick start guide is for reference only. Minor difference might be found in user interface.
- All the design and software here are subject to change without prior written notice.
- All trademarks and registered trademarks mentioned are the properties of their respective owners.
- Please visit our website or contact your local service engineer for more information.
- If there is any uncertainty or controversy, please refer to our final explanation.

Step 4

Wait for booting to be finished, and then the camera indicator flashes with green light.

Step 5

Connect your smart phone to your Wi-Fi network, and make sure your smart phone is connected to Wi-Fi network with 2.4 GHz band, and then do the following operations to finish adding camera.

Device	Scan	Setup	Setup
Add Device		WiFi Name / Next	Add Successful / Live View
Note:
- If you have more than one camera, do step 5 to add them one by one.
- If the Wi-Fi network has changed or the indicator status goes wrong, reset the camera, and then do step 5 to add it again.

Installing Camera

Note: Make sure that the mounting surface is strong enough to hold at least three times of the device weight.

- Mounting Surface
- Positioning Map
- Expansion Bolt
- Mounting Plate
- Self-tapping Screw
- Camera
Step 1 Drill screw holes on the mounting surface as the mounting map shows, and then put in the expansion bolts.

Step 2 Attach the mounting plate to the mounting surface with the self-tapping screws.

Step 3 Attach the camera to the mounting plate, then power it up, and then, adjust the lens to the ideal angle.

FAQ

▶ Q: How to reset the camera to factory default?

Press the reset button for 10 s, then the camera will restore to factory default and reboot automatically.

▶ Q: The device cannot boot up?

Check the LED indicator status. If it is not green light on, reset the camera and configure the camera again.

▶ Q: Connection is offline when you configure Wi-Fi?

- Be sure that the LED indicator is flashing green before you configure Wi-Fi.
- The camera supports 2.4 GHz only. Make sure that your phone is connected to 2.4GHz Wi-Fi.
- Keep your phone and camera within 30 cm (12 inch) distance during the connecting period.

▶ Q: The device is offline?

Check the indicator status:

- If the green light is on, check whether the router can connect to the Internet. If Internet is working, restart the camera.
- If the red light flashes, reset the camera, and then configure the camera again.
- If the red light is on, it means the camera is faulty.

▶ Q: How to connect the camera to a new Wi-Fi?

- If camera is online, select **Device > Network Config** to change the Wi-Fi connection.
- If camera is offline, reset the camera, and then configure the camera again.
